Over 85% of a child's cumulative brain development occurs prior to the age of 6. Which indicates the critical importance of appropriate care and stimulation of the brain in the early years in order to ensure healthy brain development and growth.

Presently, quality Early Childhood Care and Education (ECCE) is not available to crores of young children, particularly children from socio-economically disadvantaged and rural backgrounds.

NEP 2020 advocates that the universal provisioning of quality early childhood development, care, and education must thus be achieved as soon as possible, and no later than 2030, to ensure that all students entering Grade 1 are school ready.

A Big Opportunity for all of us to bring a Big Change in Early Childhood Care and Education
