Content Reviewer & Quality Analyst,
Trivium Educational Services

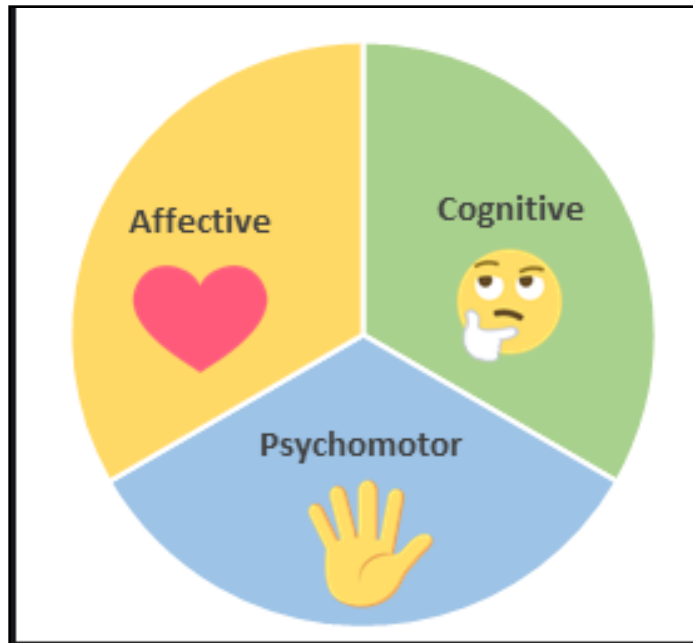

First Day of School

- Welcome them with a smile
- Build a relationship with them
- Make them feel special – give them a small gift, maybe a card/popsicle with their name on it.....
- Allow them to make friends
- Take them for a school tour – the play area

Domains of Learning

Cognitive Domain: Knowledge = think

Affective Domain: Attitude = feel

Psychomotor Domain: Skills = do

Basis of curriculum

Goal 1: Children maintain good health and well-being. These aspects include the development of self-concept, self-control, social skills, eye hand coordination, and refinement of gross-motor and fine motor skills.

Goal 2: Children become effective communicators. This goal explains the development of language, and literacy skills to make children effective communicators.

Goal 3: Children are involved learners and connect with their immediate environment. This goal highlights how different concepts are formed and skills are acquired by the children when they interact with the environment.

Developing Multiple Intelligences in young Learner's

2 LOVES that work wonders

- love/ passion for teaching
- love for the kids

5 C's for Authentic learning

• Communication

• Collaboration

• Creativity

• Critical Thinking

Adopting innovative and different strategies
(weaving in activities and experiences in
teaching)
Creating stimulating environment

HELP

All children succeed as learners
