

Skype is a communication platform developed by Microsoft that allows users to make voice and video calls, send instant messages, and share files over the internet. It is widely used for both personal and professional communication. Skype supports one-on-one conversations as well as group calls, making it ideal for meetings, interviews, and online collaboration. Users can also share screens during calls, enhancing productivity and teamwork. Available on computers, smartphones, and tablets, Skype helps people stay connected across distances. Its integration with Microsoft services makes it especially useful in business environments and remote working setups.
