Q1. Write html and css for the following using div

Ans-div>: The Content Division element. The <div> HTML element is **the generic container for flow content**. It has no effect on the content or layout until styled in some way using CSS (e.g. styling is directly applied to it, or some kind of layout model like Flexbox is applied to its parent element).

Q 2. Write html for the following table

Ans-ables in HTML

```
Tables

Table Elements:
 - caption
 - table row
 - table heading
 - table definition

 Table Attributes:
 - Spacing
 - Padding
