

Ques

<HTML>

<HEAD>

<style> <head>

<body

<table border="10px" align="center">
width="800px"

<tr> by colour="Pink">

<td colspan="2">

<tr>

<td> height="100px"

<td> by colour="green" navigation <td>

<td> by colour="yellow" content <td>

<td> by colour="purple" sidebar </td>

</tr>

<tr>

<td colspan="3" align="center">

</td>

</table>

</body>

</html>

```

2 <Doctype HTML>
  <HTML>
    <Style>
      <table id i
        border - solid 1px cccccc: ?
        id ?
        height 100px;
        width 160px;
        text-align: center;
        {
        id ?
        padding 2px 3
      </Style>
      <head>
        <body>
          <table border = "1" Colspan = "3">
            <tr> <td> H1 </td> <td> H2 </td> <td> H3 </td>
              </tr>
              <tr>
                <td colspan = "2"> C1 </td>
                <td colspan = "2"> C2 </td>
              </tr>
              <td> C3 </td>
              <td> C4 </td>
            </tr>
          </body>
        </HTML>

```

Ques 3 Write a programme to display count from 5 to 16 using for loops as given below?

Ans

```
< for
    & count = 5
    while (& count <= 16)
        echo & count;
        echo " " <br>;
        & count ++;
    & )
```

Ques 4 Write a programme in java script for unit communication from a kilometres (km) to Centimetres (cm) use of message box is necessary

Ans

```
< form
    < table>
    < input type = "text" name = "km" id = "km">
    Kilometres
    < table>
    < br>
    < table>
    < input type = "text" name = "cm" id = "cm">
    Centimetres
    < table>
    < br>
    < button>
    on click = "conversion function ()" Convert
    < / button>
```

~~L/ form~~

<Script> function Conversion function </>

var len = document.getElementById("am");

var cm = 10000 * len;

document.getElementById("cm").innerHTML

HTML = cm;

</Script>
