

Instruction for Students

The Assessment is divided into Two parts

- Basic Python Programming
- Data Analysis for Python Programming

The students need to write python program in Jupyter notebook

The students need to ensure that comments are written for the python programs

The Data Analysis task needs have at least 5 different analyses based on the dataset given.

Basic Python Programming

1. Can you write a program to find the average of odd numbers in the given list?
2. Write a Python Program to Find the third Largest Number in the given list?
3. Write a Python Program to find the count of Even and odd numbers in the given list?
