

## Radio, videos. photos & calculator on mobile

Mobile radio or mobiles refer to wireless communications systems and devices which are based on radio frequencies (using commonly UHF or VHF frequencies), and where the path of communications is movable on either end.

Video is an electronic medium for the recording, copying, playback, broadcasting, and display of moving visual media. Video was first developed for mechanical television systems, which were quickly replaced by cathode-ray tube systems which, in turn, were replaced by flat panel displays of several types.

A photograph is an image created by light falling on a photosensitive surface, usually photographic film or an electronic image sensor, such as a CCD or a CMOS chip.

Calculator provides simple and advanced mathematical functions in a beautifully designed app. • Perform basic calculations such as addition, subtraction, multiplication, and division. • Do scientific operations such as trigonometric, logarithmic, and exponential functions.
