

Part-2

Q-3 write a program to display Count from 5 to 15 using PHP loop as given below.

Ans Rules & Hint

- You can use for as while loop
- You can use variable to initialize count
- You can use html tag for line break

View solution | Program

```
<?php  
$count = 5;  
while ($count <= 15)  
{  
}
```

```
echo $count;  
echo "br";  
$count++;
```

Q-4 write a program on Javascript for unit conversion from kilometer (km) to centimeter (cm) use of message box or message.

Ans Program to Convert kilometer to Centimeter

We will learn how to convert the length value, which is given in kilometer, to the length in centimeter.

If we want to convert the value of kilometers into cm value we have to use the following formula

CCA-104  
Web Technologies  
Assignment

Q-1 write html and CSS for the following using div

Navigation	Header	Content	Sidebars
Article	Head	Default	Right sidebar
Article	<body>	Left sidebar	No "
Article	</body>	Both "	both "only

Definition and Usage

The <div> tag defines a division or a section on a HTML document.  
The <div> tag is used as a container for HTML elements.

which is then styled with CSS as manipulated with some script. The <div> tag is easily styled by using the class or id attribute.

Q-2 write html for the following table

```
<html>
<head>
<style>
table, th, td {
border: 1px solid black;
border-collapse: collapse;
}
</style>
</head>
<body>

| HT | HT |
|----|----|
| HT | HT |

</body>
```

1 Km = 100000 Cm  
Cm = 100000 Kilometers

0.2 km (height) / 1000 >

<tr style="border: 1px solid black;">  
<td colspan="2" style="text-align: center; padding: 5px;">font-align: center</tr>  
<tr style="border: 1px solid black;">  
<td style="padding: 5px;">font-size: 24px<td style="padding: 5px;">font-size: 24px</tr>  
<tr style="border: 1px solid black;">  
<td colspan="2" style="text-align: center; padding: 5px;">font-size: 24px</tr>

</tr >

<tr style="border: 1px solid black;">  
<td colspan="2" style="text-align: center; padding: 5px;">font-align: center</tr>  
<tr style="border: 1px solid black;">  
<td style="padding: 5px;">font-size: 24px<td style="padding: 5px;">font-size: 24px</tr>  
<tr style="border: 1px solid black;">  
<td colspan="2" style="text-align: center; padding: 5px;">font-size: 24px</tr>

</tr >

</table >

</body >

</html >
