

The Need for Career Guidance

- Action Plan
- Preparation
- Exploration
- Self-Awareness

Self-Awareness

The career counsellor creates an understanding of the student, through the self-assessment process and personal engagement with the student.

- Hear the student's story and take stock of the present situation
- Create an environment of trust and faith in the student
- Develop empathy
- Make the initial assessment of the student-psychometric assessment and conversation

Exploration

The career counsellor helps the student in understanding the different career options available.

- Build a list of career options in accordance to the personality, interests and skills
- Understanding the pros and cons of each career options
- Future prospects and suitability in context to the child
- Shortlist career options further based on current parameters and context

Preparation

The career counsellor helps the student in advising and preparing the profile of the student in accordance to the career selected.

- Assists in resume building
- Identifying and planning for competitive exams
- Recommend courses and internships
- Make the initial assessment of the student-psychometric assessment and conversation

Action Plan

The career counsellor assists the student in laying out a roadmap for the student.

- Understand short-term and long-term goals
- Understand the various educational and vocational courses required for developing the career
- Identify potential employers
- Build resume
- Prepare for interviews
- Make a job search strategy
