

5 to 15 using PHP loop

Q 3. Write a program to display count, as given below.

Ans

Rules and Hint.

- You can use "for" or "while" loop.
- You can use variable to initialize count.
- You can use HTML tag for line break.

```
<? php
$count = 5;
while ($count <= 15)
{
    echo $count;
    echo "<br>";
    $count++;
}
?>
```

Q 4. Write a program in javascript for unit conversion from kilometer (km) to centimeter (cm). use of message box is necessary.

Ans

This is a Java program which converts the value of km to cm.

```
import java.io.*;
class convert {
    static double conversion - kilometer - to - cm (int kilometer)
    {
        *
        double centimeter;
        centimeter = 100000 * kilometer;
        System.out.printf ("value in centimeter is : %d \n", centimeter);
        return 0;
    }
    public static void main (String args [])
    {
        int kilometer = 2.008457;
```

Compression - kilonewton - to - mm (kilometer);

}
}

Output :
Value in Centimeter is : 200845.40
