

FACULTY INTRODUCTION

Boston Training Academy announced partnership with the CSC Academy and launch professional industry partnership programs in Data Science, Business Analytics, and Artificial Intelligence. It is an incredible opportunity to be aligned with the government of India, its AI for All initiative, and its vision for the future.

With the deployment of this initiative, India is demonstrating a commendable and very far-sighted approach. Artificial intelligence is not an abstract matter, after all – it has to be applied intelligently and through this initiative, can ensure that all enterprises, as well as individuals, can remain abreast of what is possible not just today but also tomorrow.

Being a leader in solutions for AI, with over 30 years of experience in the field of technology and innovation, and unbridled access to the world's leading minds in AI and technology innovation across all sectors means that Boston is perfectly positioned to join the CSC Academy in a shared mission to make digital skills and knowledge available to all.

Through the Boston Training Academy, blend of virtual, personal, and e-learning modules, utilizing a world-class infrastructure of tools and techniques and delivered by global experts, have already proven to be a success. The global relationships with leading innovation vendors such as NVIDIA, Supermicro, Intel, and Graphcore have been chosen as the partner to deliver the AI curriculum, and very excited to bring their expertise and forward-thinking to the learner's experience and journey.

Education For All

The CSC Academy is a part of the Digital India initiative, providing access to professional learning for people with diverse backgrounds and educational needs, through a rigorous, positive, and transformative educational experience, driven by the extensive use of the very latest technologies. It has 5,930 training centers and 5,000 colleges that are already making the most of its AI and Data Science courses.
