

CCA-104: Web Technologies

Q.1) HTML code for the given table.

```
<html>
<style> table, th, td { border: 1px solid black; border-collapse: collapse; }
</style>

<table border = "1" width = 500 height = 200>
<tr>
<th colspan = 500 align = "center">Header</th>
</tr>
<tr style = "height: 200">
<td width = 80 align = center valign = top> navigation</td>
<td width = 300 align = center valign = top> content</td>
<td width = 120 align = center valign = top> sidebar</td>
</tr>
<tr>
<th colspan = 500 align = "centre"> footer</th>
</tr>
</table>
</html>
```

Q2.

HTML Code for the given table:

```
<html>
<style> table, th, td { border: 1px solid black; border-collapse
: collapse; }
</style>
<table border = "1" width = 800 height = 100 >
<tr>
<th align = "center"> H1</th>
<th align = "center"> H2</th>
<th align = "center"> H3</th>
</tr>
<tr>
<th rowspan = "160" align = center valign = top > C1</th>
<th colspan = "600" align = center valign = top> C2</th>
</tr>
<tr>
<th colspan = 0 align = "center"> C3</th>
<th align = "center"> C4</th>
</tr>
</table>
</html>
```

Q.3.

PART-2

Program to display count from 5 to 15 using PHP LOOP

```
<?PHP
```

```
$count = 5;
```

```
while($count <= 15)
```

```
{
```

```
    echo $count;
```

```
    echo "<br>";
```

```
    $count++;
```

```
}
```

```
?>
```

OUTPUT:

5

6

7

8

9

10

11

12

13

14

15

Q.4 Program in javascript for unit conversion from kilometer(km) to centimeter (cm),

```
if (option_from === "kilometer" && option_to === "centimeter")
```

```
{
```

```
    result value = Number(input.value) * 100000;
```

```
}
```

Message box Program:

```
<div class = "converter-body">
<h1 class = "converter"> Length Converter </h1>
<input type = "text" placeholder = "Input" id = "Input">
<span>=</span>
<input type = "text" placeholder = "Result" id = "result">
<select id = "InputType">
    <option value = "meter"> meter </option>
    <option value = "kilometer"> kilometer </option>
    <option value = "centimeter"> centimeter </option>
</select>
<select id = "resultType">
    <option value = "meter"> meter </option>
    <option value = "kilometer"> kilometer </option>
    <option value = "centimeter"> centimeter </option>
</select>
</div>
```
